Currently I'm getting some weird error when I try to use both GET and POST methods simultaneously. I've read some articles on the subject, but they didn't seem to clear up all my confusion. This is my request: \$ajax({ type: "GET", dataType: "json", url: "/forums/update_fields", data: \$('#forums_update_fields_form').serialize(), success: function(data) { } }); \$ajax({ type: "POST", data: \$('#forums_update_fields_form').serialize(), url: "/forums/update_fields", dataType: "json", success: function(data) { } }); This is the error I get: ActionController::ParameterMissing in ForumsController
