EPub Metadata Editor Free [2022]

EPub Metadata Editor is a lightweight tool that helps you edit the information of your EPub ebook files. Quick installation and user-friendly interface The app comes with a simple, intuitive interface that can be figured out easily by users of all levels of experience, no matter if they have worked with similar software before or not. The program allows you to modify various important details, such as the book's name and author. As an alternative, you can also add the name of the editor, illustrator or translator. You can also add the title of the series that the work is part of (if any), as well as the series' index. Other details you can include are the name of the publisher and the original publication date, so you can keep track of how old the items in your collection are. The book's type and format can also be filled in, along with the source and language it's written in. Comes with advanced functions like the file editor EPub Metadata Editor also enables you to fill in a short description of the novel. This can be either a personal note on the book or a short review you found online. It particularly comes in handy for books that are not that well-known. It is worth mentioning that the utility includes batch operations and advanced functions. While the first option could save you a lot of time and energy when processing multiple files, the later allows you to edit the TOC.NCX and OPT files. Furthermore, after loading a file, you can also view the table of contents. Then again, despite the large variety of e-book formats on the market (AZW, MOBI, PDB, BBeB, LIT etc) the software supports only EPub files. A useful tool for managing and editing EPub files All in all, the program is easy to use and comes with a clean interface. All users should be able to modify EPub files' metadata without problems. Pros: Quick installation and user-friendly interface. EPub Metadata Editor comes with batch operations and advanced functions. Cons: The software is only compatible with EPub files. I am making a web application which has a click counter that gets incremented and set to 0 upon every successful count. However, it is acting weird. First off, I am at a loss as to why it does not set the counter to zero upon every click, even though I try to. The current code I am using is as follows: JS Code: jQuery(".countdown-menu-box").on("click", function() { var event = new CustomEvent("tap", { detail: 0 }); document.dispatchEvent(event); this.element.innerHTML = "0"; }); CSS: .countdown-menu-box { display: inline-block;
