AutoCAD History AutoCAD (originally AutoCAD, in the 1980s) is the first CAD/Drafting system that let you create two-dimensional and three-dimensional drawings and models from within a CAD program instead of as separate applications. Before AutoCAD, you used separate applications for drawing (a mouse), editing (a keyboard), and viewing (a monitor). AutoCAD was developed by Ron Bilow in 1979. In March 1981, Ron Bilow launched an AutoCAD user group called the Info Users Group (IUG). Over the next three years, Bilow wrote a number of AutoCAD programs to address common problems and questions. Bilow had two employees to help him with AutoCAD: Janice Johnston and Dale Bruderer. In July 1984, Autodesk was incorporated by Ron Bilow and two other employees. In August 1984, Bilow and Autodesk formed a partnership. The Autodesk AutoCAD User Group (AAUG) was created in September 1984. In 1986, Bilow and his team (Johnston, Bruderer, and Chris Rogers) left Autodesk to form Autodesk Technical Services (ATS), a company that offers customer service to Autodesk customers. At the time, Autodesk was headquartered in downtown San Francisco. ATS was located in San Jose. In March 1987, Autodesk released its first desktop CAD/Drafting software application, Drafting & Annotation. In December 1989, Autodesk released AutoCAD on a floppy disk. In November 1992, Autodesk introduced AutoCAD NT, a networking software application. In September 1995,
