## IdnWebShieldPro Crack

IdnWebShield pro toolkit is a server based security software combines seven technologies completely focusing on Phishing & Pharming protection. IdnWebShield is a security tool that provides full protection against all Phishing & Pharming attacks. IdnWebShield is already preconfigured for full protection mode, easy-to-install and easy-to-use (it works automatically in the background) for anybody without detailed computer-knowledge, or fully configurable for anybody who likes to play with IdnWebShield and its features IdnWebShield features:

- ☑ Base protection against Phishing with anti-Phishing blacklist: Dangerous Internet resources listed in the g4bi database are blocked by IdnWebShield.
- ☑ Phishing-toolkit-blocker: is referred to as a blacklist extension which checks web links against particular "Phishing-toolkit signatures". Phishing-toolkits are referred to as software programmes which enable criminals to easily create large Internet portals of spoofed websites.
- ☑ Phishing attack prevention with IdnCCD protocol: Prevents Phishing attacks with international domain names.
- ☑ Phishing attack prevention anti-Pharming local DNS monitor: Monitors your local "hosts" file for any changes notifies you accordingly if you try to access some internet resource quoted in this file.
- ☑ Pharming attack prevention anti-Pharming authenticated DNS cache: Processing your web requests IdnWebShield accepts DNS information only from authoritative nameservers.
- ☑ Phishing attack prevention with anti-Phishing URL monitor : Analyzes the format of requested links. Prevents Phishing attacks which use some form of technical deception designed to make a link in an email appear to belong to a certain organization.
- ☑ World-Wide-Web link detective: looks up background information about a link. It should complement your knowledge of what is going on behind the scenes.

How to use IdnWebShield pro: (1)On the Basic tab: The Basic tab has the three settings : ☑ Phishing Protection: which is set on the "ON" position by default. ☑ TACO Status: (For any link identified in the name of the organization, the taco code is automatically inserted into the link) is set to ON. The "TACO Setting" is explained in "TACO Determination Setup". (2)On the T

## IdnWebShieldPro Crack + PC/Windows

IdnWebShieldPro is a server based security software combines seven technologies completely focusing on Phishing & Pharming protection. IdnWebShield is a security tool that provides full protection against all Phishing and Pharming attacks. IdnWebShield is already preconfigured for full protection mode, easy-to-install and easy-to-use (it works automatically in the background) for anybody without detailed computer-knowledge, or fully configurable for anybody who likes to play with IdnWebShield and its features. Here are some key features of "IdnWebShieldPro":

- ☑ Base protection against Phishing with anti-Phishing blacklist : Dangerous Internet resources listed in the g4bi database are blocked by IdnWebShield.
- ☑ Phishing-toolkit-blocker: is referred to as a blacklist extension which checks web links against particular "Phishing-toolkit signatures". Phishing-toolkits are referred to as software programmes which enable criminals to easily create large Internet portals of spoofed websites.
- ☑ Phishing attack prevention with IdnCCD protocol : Prevents Phishing attacks with international domain names.
- ☑ Pharming attack prevention anti-Pharming local DNS monitor: Monitors your local "hosts" file for any changes notifies you accordingly if you try to access some internet resource quoted in this file.
- ☑ Pharming attack prevention anti-Pharming authenticated DNS cache: Processing your web requests IdnWebShield accepts DNS information only from authoritative nameservers.
- ☑ Phishing attack prevention with anti-Phishing URL monitor : Analyzes the format of requested links. Prevents Phishing attacks which use some form of technical deception designed to make a link in an email appear to belong to a certain organization.
- ☑ World-Wide-Web link detective: looks up background information about a link. It should complement your knowledge of what is going on behind the scenes.

## IdnWebShieldPro Keygen Full Version

☒ Quick-start guide for the beginner. ☒ System requirements. ☒ User manual. ☒ Main screen. ☒ Webpage scanner: This feature scans and compares the content of webpages to the content of a database. ☒ Webpage scanner (advanced): This feature scans and compares the content of webpages to the content of a database. ☒ Browser/proxy scanner: This feature scans the visited Web pages to detect and detect malicious code. ☒ Browser/proxy scanner (advanced): This feature detects and detects malicious code in the browser's cache. ☒ Application scanner: This feature checks for applications present on the system, including windows registry (also accessible on the command line). ☒ Application scanner (advanced): This feature verifies applications at the command line and lists what applications were detected (by name or as executables). ☒ Misc hacks : "Misc hacks", are there to fix some URL or service problems. ☒ DHCP server : This feature sends DHCP, BOOTP & UDP/DHCP to selected IP (gateway IP). ☒ Protocol analyzer : Is designed to record and display data from on-the-fly scanning of network traffic, such as data from network sniffing (Wireshark, tcpdump). ☒ Proxy Server : This feature redirects your web requests to servers through other selected servers. ☒ Internet task monitor : Is used to keep track of Internet activity that your computer makes. ☒ Anti-Phishing-toolkit-blocker: is referred to as a "blacklist" extension. ☒ Bit-fiddling extensions : These features are used to generate random number (for a coin toss, for example) ☒ ISO virus scanner (installed for you) : Virus Scanner may also be used as a proxy for the task-monitor. ☒ Phishing-toolkit-blocker (installed for you): Block phishing-toolkit and phishing-toolkit based software if you don't want these attacks to attempt to infect your computer. ☒ Pharming attack prevention anti-Pharming local DNS monitor: Monitors your local "hosts" file for any changes notifies you accordingly if you try to access some internet resource quoted in this file. ☒ Pharming attack prevention anti-Pharming

### What's New in the?

"IdnWebShieldPro" - it is a server-based security software combines seven technologies completely focusing on Phishing & Pharming protection. With "IdnWebShieldPro" you may skip website navigation and connections to some Internet resources - the software just takes care of protecting your computer from all types of phishing attacks, while you enjoy the Internet resources you love. IdnWebShieldPro is a web based security software which works completely on your server. It does not require installing any software to your personal computer as well as it does not modify your personal computer's settings, or may affect your performance. IdnWebShieldPro provides you with both Phishing and Pharming protection, a lot of features that will not only protect you, but that will provide you with more Internet experience. It runs in the background of your personal computer and provides you real-time protection while you browse the Internet. IdnWebShieldPro works with most web browsers, while it offers support for Internet Explorer and Chrome, Firefox, Opera, Safari and every other web browser you may use. IdnWebShieldPro may be fully configured using its installation-tutorial or in quick-mode, with an easy-to-use interface that will help you in minutes to protect your personal computer from phishing and pharming attacks. IdnWebShieldPro is a dynamic security software that uses seven different technologies completely focused on Phishing & Pharming protection that can support you even in a situation when your computer is being infected by any malicious software. IdnWebShieldPro uses "Phishing-toolkit-blocker", that may exclude from your Internet experience, online resources, which may be considered to be dangerous. "Phishing-toolkit-blocker" checks suspicious domain names and resources, with special attention to online portals created by Phishing-toolkit-writers. "Phishing-toolkit-blocker" also operates DNS servers and is referred to as "Pharming-local-DNS-blocker", that may exclude most dangerous resources, that are being considered to be dangerous. "Pharming-local-DNS-blocker" may block access to some online resources, which may be attacked by pharming software. "Pharming-local-DNS-blocker" includes an integrated "Pharming-hosts-blocker", that may exclude some of your favorite websites, that could be compromised by Pharming software. "Pharming-hosts-block
