Q: How to plot with even and uneven points on y axis in Python? I am trying to plot a time series on 2 axis in python using matplotlib. There are even and uneven points in the time series. The plot is given below. As shown in the figure, the point and the bars are equally scattered on y axis and hence it is difficult to know which points are uneven or even. I have used the matplotlib.gridspec.GridSpec with 2 equally spaced grids. But the problem is that there is no space for uneven points. Please help me to solve this problem.

A: The problem is that the axes lines are at different scales. You can solve this by setting the tick locations to be at the same locations on both axes.

```
import matplotlib.pyplot as plt
import numpy as np
ts = np.arange(0.0, 10.0, .01)
fig, ax = plt.subplots()
ax.set_xlim(-1.0, 1.0)
ax.set_ylim(-1.0, 1.0)
ax.grid()
ax.set_yticks([-1.0, 0.0, 1.0])
ax.set_yticklabels(['-1', '0', '1'])
plt.plot(ts, [], marker='o', label='0')
plt.plot(ts, [], marker='o', label='1')
plt.show()
```

Social Media Service Hours Cars for Sale in Baker, MN For over three decades, Baker's Best used car dealers have been in business. If you want to sell your car for the right price in Baker, look no further. FrameFun Activation Code Free Download

Framemouse is the ideal program for users who want to create original frames from your photos! The program will create a wide range of frames: the wooden frame, basket, clock, but also classic frames with diamond frame. You can create your frames from various materials, such as wood, metal, leather and cardboard. The entire process of creating a frame is easy and fast, as Framemouse's user interface is very simple to use. You can easily customize the frame in a number of ways: personalize the frame's dimensions, change colors, and add some decorations to the frame. When you need to edit pictures easily and quickly you can surely use any photo editor for your desktop. Some of them are capable of more, some of them are really simple, but what they all have in common is they can help you to enhance your pictures. GraphicsPaint is one of them and as the name suggests can add various graphics to your images. Let's take a look at all the things it can do for you. Create a logo and brand with a large choice of pre-designed icons Nowadays a logo is not limited to just the name of a company. A lot of design companies offer a wide choice of design icons to choose from, and you can also create a logo of your own. You can also create an icon as an emblem for your site or a corporate card. Paint the logo and icon from your photos This is one of the most interesting features of the application. You can take a photo of a logo and if it is not clear or blurry you can add the logo to it, using the mouse. Now you can place it anywhere on the picture and you can see how it will look like. The most important thing is you can have a nice preview in real time. Add borders to the logo and icons Just like with a normal paint you can add a shadow, or paint the borders of the image. This is especially useful when you want to add a shadow to your icon or logo. Add 3D effects to the photo If you want to add some extra effects to your photo this is what you need. You can add a cool effect to your image by choosing 3D effects. With the buttons you can add star, gradient, shadow, lighting, volume, displacement and motion blur. Also with a few more clicks you can add your logo to the picture and it will look great. Toonery is a
