Contents show] Features A common feature of AutoCAD and AutoCAD LT is a user interface that provides a 2D drawing workspace on a 2D drawing canvas, typically on a window or on a drawing area that is displayed within a window. The user interface is user-configurable, allowing users to customize each workspace to fit their personal preferences. The software provides these toolbars and palettes in the user interface: The Menubar, the Menu bar that is located at the top of the interface, which is populated by a set of standard commands and functions that are used for drawing, rotating, panning, and zooming. The Panel, the palette of tools and functions that are usually populated with the various commands for the types of tasks that are required for drawing, analyzing, and editing a drawing. The Palettes, the menus, drop-down lists, and toolbars that are used for data input, navigation, viewing, measuring, selecting, annotating, and drawing. Modelling A series of extensions or add-on products were released throughout Autodesk's history, but Autodesk Revit began to gain popularity as a replacement. In 2003, with the release of AutoCAD For Windows 10 Crack R14, a project management application called TeamSite was added to CAD. It incorporated many of the Revit capabilities to make them more useful for project management. Also, R14 introduced BIM 360 technology, which allowed the building of a model that could be imported into a project, either from a 2D model or 3D models. The addition of model tools, such as grids and a crop tool, were added in subsequent releases, including the 3D and Revit versions. In 2007, Autodesk announced a partnership with Google to produce a new version of AutoCAD Activation Code in 2008, known as Google AutoCAD Full Crack. The 2010 release of AutoCAD was the first to not include a

native Windows viewer. It also included a new style engine, "CAD Drafting Style Builder", which allowed users to create and apply different drafting style on a CAD drawing, in addition to customisable graph editors. In 2010, Autodesk announced the discontinuation of the Google AutoCAD, with a release scheduled for October 2013. In 2013, Autodesk announced a new set of modeling tools known as AutoCAD Architecture to create 2D or 3D architectural drawings. In March 2014, Autodesk released AutoCAD for iOS, a free mobile app for the Apple iPhone and iPad.
