Alternative Product Some projects have been created to bridge the gap between creating drawings with AutoCAD and other Autodesk drawing applications. An example of such a bridge is the open-source free cross-platform Inkscape vector graphics editor. Add-ons There are hundreds of AutoCAD add-ons (plug-ins, plug-in extensibility) available on the Autodesk Exchange App Store and Autodesk Direct. These applications extend AutoCAD's capabilities and functionality, and many are also available for free. Since Autodesk Exchange App Store is not supported anymore since 2017, the add-ons have to be installed on users PC manually. Some are browser-based, which means that they can be installed from any device such as a smartphone, tablet, or computer. Support AutoCAD is designed to be an industry standard and is in use around the world in a variety of fields. Since version 2015, Autodesk has added new functionality to AutoCAD. Support is also available in the App Store. Training Since version 2015, Autodesk has provided online and classroom-based training resources, including videos and PowerPoint slides, that can be used for self-study, training and consulting. Since 2015, Autodesk has provided an online Live Training portal that contains live webinars, videos, and webcasts. Autodesk has also extended Autodesk's training resources to include online eLearning courses. Certification Autodesk offers professional certificates to both AutoCAD and AutoCAD LT users. Most certificates are awarded based on completion of a particular course, and others are awarded based on experience and expertise in specific areas. Completion of these courses enables users to meet licensing requirements for AutoCAD LT and AutoCAD. Certificates are issued by Autodesk TestCenter, which has branches in three countries. TestCenter has its own set of certification procedures, and the test is the only independent certification process. Certificates are also issued by NGS Pearson VUE and Pluralsight. Other certification tests exist, but they are based on the specific content of the course, and are offered by third parties.
