A conservative opinion of this product, since it is a light action RPG with a cheap-looking GUI. System: RPG Maker A conservative opinion of this product, since it is a light action RPG with a cheap-looking GUI. System: RPG Maker Sega says that this is a Final Fantasy RPG remake for the Sega Saturn New Fantasy has been in development since the closed beta version released earlier this month. It's not made by Square, but rather by its mobile/online game division, Omega Force. The development team is divided, with the RPG making side handled by Omega Force and the others, with development of a brand new game called "A Link to Awakening," being handled by Omega Force's other division, the company that developed Final Fantasy XII. "The next Final Fantasy for the Sega Saturn," says the company. The transition from PlayStation to Sega Saturn is typically a sharp, clear cut, but in this case, it's complicated by the fact that the one game coming to the system came to the PlayStation in North America, but never to the Saturn. The other side of the coin in this equation is that Final Fantasy VII, while ported to the Saturn, never saw a North American release. The absence of a reliable source for the old Final Fantasy gaming experience on the Sega Saturn made it a bit of a challenge for this project to gain support. Even though the team is divided into two factions - the "RPG" game and the "mobile game" game - both are working on the project separately, with Omega Force handling the Final Fantasy side and the new game division handling the "A Link to cel-shaded Awakening" part. The game was announced at Tokyo Game Show last year and shown at a few trade shows. I was present at one of the trade shows, the Art of Life exposition, in Las Vegas. It was there that I saw pictures of New Fantasy, as well as a game called "Rome Total War" (read our review of that one here), which has a similar history to New Fantasy. What is interesting about the announcement of New Fantasy is that it was simultaneously announced as a mid-2009 launch title for the Nintendo Wii. If there's a lesson to be learned here, it's that Nintendo is quite receptive to outside development titles. I'm sure if the team at Omega Force could have gotten together with the company that developed Final Fantasy VII, and come up with a proposal for the game, they'd be able to shake hands on a deal. Two key features are brandishing the power of the Elden Ring and leaving the body to fight. To brandish the power of the Elden Ring, a new ability "Elden Ring" is created. The more the number of attack using the ability is increased, the higher the damage to enemies is. Only the "Elden Ring" ability, the "Smash" action, and the "Submerge" action can be used while brandishing the power of the Elden Ring. The "Smash" action causes the elemental power to be absorbed into the body. The power is used as attack to deal huge damage and deal damage to an enemy from behind. The "Submerge" action causes the body to be submerged into the water and deals huge damage. Note. You can use the power of the Elden Ring once every 10 sec. The brandishing power of the Elden Ring is consumed by the "Elden Ring" ability. When the power of the Elden Ring is used, your body disappears and the effect lasts for 30 sec. During the effects, the damage the power of the Elden Ring deals is drastically reduced. However, the damage you inflict is increased. When the effect ends, the powers returns. Note. You cannot be submerged during the effect. Additionally, it is possible for the power of the Elden Ring to be forgotten. When the power of the Elden Ring is forgotten, it returns to the body.
