Fifa 22 Serial Number [April-2022]

“The team was tasked with combining the most immersive game engine in the series with our elite motion capture technology to capture the speed and physicality of the players and create an unparalleled game experience,” said Raphael Menard, chief creative director for EA Sports. “The result is that when you pick up the controller, it is impossible not to feel like you are standing on the pitch with your favorite players.” Storylines are now a set piece and free kick based, so players can build up to a set shot and make choices that directly affect both the story and the outcome of the match. New male and female commentators offer insightful analysis of the game’s story while conveying a full range of emotions. Driving in to FIFA 22 will be the new ‘Crowd Journey’ feature. Players can now jump directly into a match from their matchday app, and this will allow them to play through a live match of the day. PLAYERS New Pro Skills & Ultimate Team All-Stars: Players can now enjoy a dynamic control scheme. Control over defensive structures, crosses, the pace of the game and individual dribbling, all with the press of a button. The new control scheme gives players more choice over how they want to play. The new control scheme was designed to feel natural and intuitive to control as well as the best experience for players using an Xbox One controller. Referee & Tactics Changes: The number of fouls that can be committed has been reduced, making it a bit easier to play. Some of the AI camera angles have been altered to make the game feel more like a real match. The Behaviour Engine was tuned to better model the play of professional footballers, and made some of their strengths more noticeable to the player. Targeting system now fires off quicker based on the angle of the ball. During possession, defenders now automatically kick the ball away when it’s out of their area. FIFA 22 All-Stars Update: Unlock all 21 of your All-Stars through gameplay or by using Ultimate Team. Stand out stars such as David Beckham, Cristiano Ronaldo and Lionel Messi will be unlocking as part of each day’s content in game. New cards are also available for each of these superstars. F

FIFA 20 introduces Off the Ball Visual Impact, a feature that mimics live player natural movements and positions in order to give the player on the ball an entirely new look. It applies motion physics and introduces new overall gameplay, including new ball behaviours such as a new Pro Action Pass. Improved ball physics also mean that shooting, heading and dribbling are more realistic.

#### KEY FEATURES

- Off the Ball Visual Impact: A feature that mimics live player natural movements and positions in order to give the player on the ball an entirely new look. It applies motion physics and introduces new overall gameplay, including new ball behaviours such as a new Pro Action Pass.
- Ball Physics and Player Pitch Height - Improve ball physics and increase overall game realism by making them more fluid and predictable.
- Crossbar AI - The crossbar will now react to both players and crosses. Get in an early shot and it may sail in off the post, for example.

**The FIFA name has become synonymous with football for over 25 years. The series encompasses not only a football game, but also FIFA Street™, FIFA Street Academy™ and "Imagine FC". The 2012 edition is the last FIFA game to use the "World Cup Edition" tag, which will see the introduction of the "FIFA 22" series in November 2012. FIFA is the FIFA World Cup, the world's most popular football tournament, and the undisputed pinnacle of the sport. Why is FIFA 22 being developed for PlayStation®3? PlayStation®3 is the platform of choice for the fans of the sport. First-person video games, in particular, have been the most popular among fans since the PS3 launch, with over 51 million first-person video game titles being sold. FIFA needs to be on a platform that can deliver top-notch performance – day and night, with millions of players, across tens of thousands of stadiums, competing in the most famous championships around the world. Who are we targeting with FIFA 22? FIFA was built by the passionate fans of the sport. FIFA has more players in its community than any game ever released. We have fans who play the game throughout the year, both competitively and for fun. These fans aren't just competing; they're competing passionately. FIFA's goal is to deliver the most authentic football experience possible. We are targeting a very specific audience: real footballers. We are focussing on the performance aspects of the game, as FIFA's most dedicated fans want the game to be the best possible football experience. And we're delivering on that promise - not by adding new features, but through making real changes to the core gameplay. What changes in FIFA will you be making for FIFA 22? We're targeting the performance aspects of the game, and we will be making changes across every aspect of the game. These changes aren't limited to the player demo. An entire new engine is being developed for FIFA 22, based on a brand new gameplay architecture, to ensure that we can deliver the best performance possible. We've been closely working with dozens of professional football clubs, including Manchester United and Bayern Munich, to understand the internal processes of professional football clubs and share our new engine technology with them. We are breaking down the barriers between club and player to deliver the best artificial intelligence and animation in the history of the series. Football's purest game As the FIFA name has come to**
