## **What's new in Agent Awesome:**

**Scales (?) Lyrics I went too far When I said I'd die for your love After the sun is down I now realize What was on my mind Was never real I should have known When it came to question You don't play around And that's a fact Every action has a consequence Nothing's a free ride A to B, he's behind the wheel G.M.T.O. Unjustified or accidental Your actions all gave way to trauma How could I know I'm such a fool I'm so gaffe [Chorus] I make mistakes Willingly and regretfully Each move I make Will be loved, or I'll be destroyed Out of my league you're cast When I blend in with the crowd But just look past the guard At you and I fall through The fault is mine, all mine Don't make mistakes, just take your time Can't go rush, take your time I'll do my best to make you see That love is worth the fight Nothing's too hard, it's true To achieve You must be blind You need to look back at what's past To see this is history In the same hands You're living out fate The fault is mine, I'll always blame you Can't go rush, take your time I'll do my best to make you see That love is worth the fight Nothing's too hard, it's true To achieve You must be blind You need to look back at what's past To see this is history In the same hands You're living out fate (Hey, I've had a crappy day. I don't even have a band right now, I'm a slacker.) All I have is a single headache and I'm noticing all of my flaws In a**

moment, I'm asking you for your help, to make every day better But I don't want your advice I'm on my own terms and only I know which ones are important and which aren't Most days, I don't know what I'm gonna say next But, mostly I like the way you look right now You're the reason I know that I got a second chance You're the reason I'm gonna try, you're the reason I feel so proud (This isn't a lie)

After the destruction of the Roman Empire by the invading Germanic tribes, a new Rome rises from the ashes, this time as a Christian Roman Republic. Virtual Rome Reborn is a virtual reconstruction of Rome, preserving the most important monuments in the free Republic period. Virtual reality has been used to create a new vision of the city. Instead of viewing it as we did hundreds of years ago through the eyes of charioteers, architects, and historians, we are now able to see it through the eyes of Roman citizens in the third century. This VR application offers even non-specialists the opportunity to get a real-time, bird's-eye view of the most important monuments in Rome, offering an innovative experience that has never before been possible. The points of view vary depending on how you look: You will be able to take a look from above as if flying over the ruins of the city, a historical approach with all the observation tools available to a historian of the period, and a bird's-eye view from the highest point in Rome, the Vatican. From the street, in the right-most scene, you will be able to see every detail of the city and its inhabitants. Experience the majesty of ancient Rome from the Piazzale del Senatore in the city centre. Exclusively for this application, there are 14 points of view.
