Download free Progressive Web App and Scrum Guide: A Guide to UX and Agile Methodologies 2013 Progressive Web App and Scrum Guide: A Guide to UX and Agile Methodologies 2013 High Antivirus is really attractive and helpful app that can keep you secure on your smartphone, to protect your PC, Android and iPhone. There are several useful tools in it. This is antivirus application that acts as antimalware as well, but better than any other antivirus application. It can help you to scan and delete files that causes your system slow down, crash or hangs your system. This application also has some wonderful tools such as a Speed Booster, System Scanner, PC Cleaner, PC Optimizer, Password manager that helps you to save time and a Network scanner that help you to scan any network within seconds. Before I start describing the features of this app, I have to discuss about its uniqueness. It has the ability to protect your privacy. I mean it provides the best privacy protection, but it does not share any information with the developer or third parties. Furthermore, it has additional security features such as Firewall, Antivirus, Personalize & Password Protect. The very important feature I would like to point out is that it does not create any log files on your PC, and it can scan more than a hundred of files every second. If you want a free antivirus program for your PC, then you must download and install High Antivirus. It is really an excellent antivirus application with all the additional features and high protection. Features of High Antivirus Clear & clean the browser history, cookies, download history, cache and much more. Clear the passwords saved on your browser. Clean any files that slows down your system. Create an on-screen keyboard (Touch screen supported). Set the default applications for each of your data types. Control your mouse by using touch screen on your PC. Set the startup options. Automatically boot-up the PC if the device is offline. You can also set various sound effects when a new application is launched or when a file is being installed or updated. High Antivirus can automatically reboot your PC, to fix system problems that arise from regular startup. Create a new language and set the language accordingly. Whenever you start your computer, it will check for updates automatically, and download them for you. You can also choose the quality of the
