Critical reception According to contemporary reviews, the novel was considered to be a decent novel. Writing for the New York Times, Renata Adler felt that the novel was a "most unusual, most un-Cohenian novel." She even went as far as to say that the novel was "unusually bad" at times due to Cohen's "bizarre" characterization. Despite the poor characterization, and the "extended tale [which] seems to drag on forever," Adler still considered the book to be well-written. While not being as negative in their reviews, The New York Times's critic, Michiko Kakutani, and The New Republic's Ann Waldron did not consider the novel to be as good as the author's previous work. Kakutani considered that although Cohen's latest work was not bad, she still found it to be "small." Waldron, unlike Kakutani, felt that the novel was "unreadable." In describing the novel, Waldron felt that it had Cohen's "over-wrought style." Waldron concluded that although the novel was "even and well-written" and was accessible to most people, it was not "very good." More positive reviews came from Publishers Weekly's reviewer and From Goodreads's reviewer. The reviewer for Publishers Weekly was impressed by the novel's well-written beginning and said that it was a "clear effort to maintain literary standards" despite being a "junk novel," that nonetheless had its merits. From Goodreads's reviewer was similarly impressed by the novel's "elegant narrative arc" and "impeccable

Heraclitus Paradox The Heraclitus Paradox is the difficult "tychism" of the Heraclitus text containing the Paradox of the One. The paradox states that the One cannot be measured, but it is the One that is measured. The paradox is implicit in Heraclitus' statement that the sun is alive: for to deny that the sun is alive is to deny that it is the same for all. Similarly, for Heraclitus, it is impossible to say that two things are alike and that they are not alike. The paradox is implicit in Heraclitus' assertion of the dynamic unity of opposites. For as the whole is greater than its parts, so all parts are identical to the whole. That is, everything is One. The paradox is also implicit in Heraclitus' idea that the world is coming into being out of the void: for this means that the world is a coming into being of what was not before. Thus the paradox is a useful tool in reading Heraclitus' views on the nature of human personality and on the social nature of the world. Definitions and forms In modern philosophy, the expression "Heraclitean paradox" refers to the Heracl
