## **IDM UltraFinder Professional 17.0.0.13 (x86 X64) Portable !!TOP!!**

ultrafinder is a fast and efficient file search tool. built on the framework of other idm applications like ultraedit and ultracompare, ultrafinder offers a lightning fast search method for finding file names, text strings, and even ms word and excel files. supports file content search as well, as long as you enter the right index/root file. also supports extensive regular expression search, a search exclude filter for path, files, parent folders, etc., and results can be exported to text and csv. ultrafinder is ideal for locating files in your computer, on a network, or on a remote server. ultra import feature ultraimport is a windows import/export module for importing and exporting files and managing file collections. with ultra import, data files can be imported and exported to and from a variety of data formats without losing the metadata embedded in the original files. for example, ultra import enables you to export a list of files in the "characters" directory without losing the directory's.lnk shortcuts and thus, preserve the relationships between the files and the directories. ultraimport is also a complete solution for managing multiple collections of data files from a single data source. ultraimport creates a personal collection workspace or project based on the files you import or export. if you have a need for importing or exporting multiple collections at once, ultraimport is the answer. ultrasearch is a fast and feature-rich search tool, building a searchable listing of drive content in seconds. file name searches narrow as they are typed and support wildcards such as \*.txt. other information such as file size and last change date are present, along with access to explorer's own context menu. ultrasearch leaves little impact on your computer's disk space because of its method of indexing and finding files. you can be assured ultrasearch does its job while keeping your computer running happy and smooth.
