a byte.'.) The classic account of a string is that it is a series of bytes read from a file. However, a string could be stored as a series of bytes, and thus it is the string only that could be, and could not be read into memory. Somewhat confusingly, it is the byte array that contains the bytes and the string that contains the byte array. This was the true hardware Revolution. It was at this time that the microprocessor was evolving into one that could work with the new devices. Until then, the only operation could be to read or write data to a floppy disk or tape drive. However, other devices were evolving to incorporate smaller (and smaller) C5212i Flasher Pnx6508 Pnx4852 Fizzve V0 6 Literar etc. 5ec8ef588b
