
Reksio Si Masina Timpului In Romana

you should be aware that i do not have a lot of experience with the games of reksio, and therefore i cannot talk much about them. in my case, some of them made some jumps in terms of quality and i became lost in them. if you know anything about the series, i would appreciate an answer to this, or if you have other general information about them. a third game was reksio in mermaid (reksio in taiarira), which has yet to be translated to romanian, and to this day i am unable to find a copy of it. the story has a mermaid stealing a bone from the temple of the sea god. this mermaid is a trickster and a fraud and she runs away with the bone and hides it. in the end, you retrieve it from a temple, but you have to dive inside the ocean and find the diving place in order to get the bone. you will eventually visit an underwater village where you can meet a fish or a crustacean who will help you find the diving place, then you dive inside it and are transported to a magical place. there you meet the mermaid again and she will kill you if you do not find the bone. upon finding it, you get a magic shield that protects you from any attack by any creature. then you have to feed the mermaid a human (perhaps a husband who has been kidnapped by a mermaid in order to gain the power of the magic shield) and when he is close enough, he will open a portal and you get to fight the mermaid, who is no longer a trickster. the game is actually split into two parts. the first part has you traveling through the underwater village and it is very colorful. the second part has you fighting the mermaid in an underwater cave and this part is graphic in a way that i have not seen in any other game. there is a fight scene in the beginning with the mermaid, which i found very creepy and that part lasts on the whole game. the whole thing ends on a cliffhanger: after the second part, which is extremely graphic in every way, you still have to play as the mermaid for a while and make more people eat, to reach an end point.
